Full Stack Test

01/Sept/2026

① Counter

```
import { useState } from "react";  
function Counter() {  
  const [count, setCount] =  
    useState(0);  
  return (  
    <div>  
      <h2>01. Counter </h2>  
      <h3>count: { count } </h3>  
      <button onClick = { () =>  
        setCount(0) }>  
        Reset  
      </button>  
    </div>  
  );  
}
```

② Todo list

```
import { useState } from "react";  
function Todo() {  
  const [text, setText] =  
    useState("");  
  const [todo, setTodo] =  
    useState(["Todo", "Set Column"]);  
  function addTodo() {  
    if (text !== "") {  
      setTodo([...todo, text]);  
      setText("");  
    }  
  }  
}
```

```
Function delete Todo (Index) {
```

```
  SetTodos([... Index, "" ])  
    !== index);  
}
```

③ login Toggle :-

```
Import (Use State) From "react";
```

```
Function (login ) {
```

```
  const [login , Set login] =
```

```
    Use state (0);
```

```
  return (
```

```
    <div>
```

```
    <h2> login Toggle </h2>
```

```
    { login ? (
```

```
      <div>
```

```
      <h3> Wel come Toggle </h3>
```

```
      < button on click = {1} =>
```

```
      < switch on back = {1} =>
```

```
    </div>
```

```
    </div>
```

```
    Set toggle ([... Button, "" ])
```

```
      !== True);
```

```
  }
```

```
}
```

④ live Search Filter :-

```
Import (Use State) From "react";
```

```
Function (live_search ) {
```

```
  const Dams = [
```

```
    " Priyanshu",
```

```
    " Nitin",
```

```
    " Sunny",
```

```
    " Sasar",
```

```
    " Navjot",
```

```
    " lucky",
```

```
    " many",
```

```
    " Sonu" ];
```

```

const result = name.filter((name)) => {
  name.toLowerCase().includes(Search.toLowerCase());
}

return (
  <div>
    <h2> liveSearch </h2>
    <input
      placeholder="Search name"
      on change = set (=> e) ?
    </div>
    <h3> No result Found </h3>
  </input>
  </div>
  </div>
  set Search Filter ([.. live-search, " "])
  != true);
}
}

```

⑤ Stopwatch

```

import (use state) from "react";
function (stop watch) {
  const [time, set time] = use state (0);
  const [start, set start] =
    use state (false);
  use effect (() => {
    let timer;
    if (start) {
      timer = setInterval (() => {
        setTime ((time) => time + 1);
      }, 1000);
    }
    return (
      <div>
        <h2> stop watch </h2>
        <h3> {time} seconds </h3>
      </div>
    );
  });
}

```

Function
Set
{
}
③ login To
Impor

④ live

Reset <button>

</div>

};

}
